Overview

Efficiency Meets Sustainability

This electric crawler mini dumper is designed to streamline material handling on construction and landscaping sites. Powered by a battery system rather than a combustion engine, it offers a zero-emission, low-noise solution that is ideal for both indoor and outdoor environments. Its robust crawler drive ensures superior traction and stability, even on uneven or challenging terrain.

Power Source

Electric Battery

Features

Common Applications

- Construction sites
- Landscaping projects
- Indoor material transport
- Agricultural use

Suitable Materials

- Bricks
- Sand
- Stones
- Wood
- Crops
- Fruits
- Construction debris

Environmental Benefits

Zero Emission, Zero Noise, Low Energy Consumption
