Product Overview

Professional Grade Deep Frying

This high-performance electric deep fryer is designed for efficient, consistent frying with a durable polished stainless steel housing. It features an adjustable thermostat ranging from 150-190°C and a convenient glass viewing window, allowing for precise control and monitoring of the cooking process. With a removable non-stick enamelled pot and versatile basket options, this unit is built for both ease of use and simple maintenance in a professional kitchen environment.
