

# Electric Delivery Scooter for Urban Transport

This electric delivery scooter is designed for urban transportation and commercial delivery purposes. It features a step-through frame for easy access and a flat floorboard for carrying cargo.

## ADDITIONAL IMAGES

## Overview

### Urban Delivery Solution

This electric delivery scooter is engineered specifically for efficient urban transport and commercial logistics. Its aerodynamic, step-through frame design ensures ease of use for frequent mounting and dismounting, while the flat floorboard and rear luggage rack provide versatile cargo capacity. Powered by a silent electric motor, it offers an environmentally friendly, emission-free alternative for city-based delivery services.

## Performance & Mechanics

Braking System	Front Disc Brake, Rear Drum Brake
Motor Type	Electric

## Design & Utility
