

Electric Delivery Tricycle with Canopy

This electric tricycle is equipped with a cargo box for secure delivery of goods. The three-wheel configuration enhances stability and maneuverability, while the canopy protects the rider from the weather.

Product Overview

Efficient Urban Delivery Solution

This electric delivery tricycle is engineered specifically for urban logistics, combining a robust cargo box for secure transport with a stable three-wheel configuration. The integrated canopy provides essential protection for the rider against various weather conditions, ensuring operational continuity. Designed for businesses prioritizing sustainability, its electric powertrain delivers quiet, emission-free performance while maintaining high maneuverability in dense city environments.

Vehicle Configuration

Rider Comfort Features

- Adjustable seat
- Intuitive control system
- Weather-resistant canopy

Wheel Configuration	Three-wheel
Weather Protection	Yes

Performance & Sustainability

Powertrain

Electric • Zero-Emission

Operational Benefits	Quiet Operation, Urban Maneuverability, Eco-Friendly
