

Electric Demolition Hammer

This electric hammer is designed for heavy-duty concrete breaking, demolition, and chipping applications. It delivers substantial force for efficient material removal and includes vibration-dampening features for user comfort.

Overview

Heavy-Duty Performance

The Z1G-FD-80A is a robust and powerful demolition hammer designed for heavy-duty concrete breaking, demolition, and chipping applications. This electric hammer features a high-impact mechanism, delivering substantial force for efficient material removal. Its ergonomic design includes vibration-dampening features for user comfort and reduced fatigue during extended use, making it ideal for construction and renovation projects.

Technical Specifications

Model Number	Z1G-FD-80A
Suitable Applications	Concrete Breaking, Demolition, Chipping, Construction, Renovation

Features

Key Features

- High-impact mechanism for efficient material removal
- Vibration-dampening ergonomic design
- Durable chuck system for secure bit retention
- Quick bit change capability
