

Electric Demolition Hammer

This is a heavy-duty electric demolition hammer designed for concrete breaking and demolition tasks. Its powerful motor delivers high impact energy for efficient material removal in construction and renovation projects.

Product Overview

Heavy-Duty Demolition Performance

This electric demolition hammer is engineered for demanding construction and renovation tasks, specifically optimized for heavy concrete breaking. Featuring a robust design and a high-impact motor, it delivers the power required for efficient material removal on professional job sites. The inclusion of an ergonomic side handle ensures enhanced control and stability during operation.

Technical Specifications

Model Number	9500
AVR Type	30

Features

Key Features

- High impact energy motor
- Robust construction design
- Side handle for enhanced control
- Durable power cord

Application

Best For	Concrete Breaking, Demolition, Construction, Renovation
