

Electric Demolition Jack Hammer

This electric pick is a powerful tool for demolition, chipping, and breaking hard materials. It features a robust motor that delivers high impact energy for efficient performance.

Overview

Professional Grade Demolition Power

This electric demolition jack hammer is engineered for high-performance tasks in construction, highway, and railway industries. Featuring military-grade alloy materials in the hammer and cylinder, alongside professional imported bearings, this tool is built for durability and reliability. It utilizes a high-efficiency motor and top-grade grease to ensure consistent performance for both indoor and outdoor demolition projects.

Technical Specifications

Performance Highlights

1 High

Motor Efficiency

1 Top-grade

Lubrication Grade

Material Composition

Military-grade Alloy (Hammer), Military-grade Alloy (Cylinder), Imported Bearings

Key Features

Suitable Industries

- Construction
- Highway Maintenance
- Railway Construction
- General Demolition

Design Advantages

Patented Technology • Heavy-duty Construction • Indoor & Outdoor Use
