

Electric Diesel Fuel Pump for Engines

This electric diesel fuel pump enhances the fuel delivery system for diesel engines. It is designed to improve cold start performance, reduce emissions, and provide a long service life.

Product Overview

High-Performance Fuel Filtration

This electric diesel fuel pump and filter assembly is engineered for heavy-duty applications, particularly in construction machinery like excavators. It features an integrated water separator designed to efficiently remove contaminants and water from the fuel system. This robust design ensures optimal engine performance, protects critical fuel system components, and extends the overall longevity of the engine.

Technical Specifications

Key Features

- Integrated water-in-fuel (WIF) sensor
- Durable black cylindrical housing
- Secure mounting clamps
- Silver aluminum alloy filter head
- Multi-port fuel line configuration

Component Type	Fuel filter assembly with integrated water separator
Primary Application	Construction Machinery, Excavators, Heavy-Duty Engines
