

Electric Drain Cleaning Machine

This electric drain cleaning machine is designed for clearing blockages in pipelines. It features a robust motor, a durable flexible shaft, and a variety of interchangeable cutting tools for different types of obstructions.

Product Overview

Professional Drain Cleaning Solution

This heavy-duty electric drain cleaning machine is designed for efficient, versatile performance in indoor plumbing environments. Featuring a compact, robust structure with adjustable support for varied working angles, it handles pipe diameters ranging from 20mm to 150mm. With multiple soft shaft options and a powerful 250W motor, this tool provides a reliable solution for clearing complex blockages in both residential and commercial pipelines.

Technical Specifications

Rated Power

250 W

Rated Power

Electrical Requirements	220V/110V, 50Hz/60Hz
Rotation Speed	400 rpm

Operational Capabilities

Cleaning Capacity Guide

Shaft Type	Pipe Diameter Range	Max Length
18mm Soft Shaft	20-75mm	4.3m
16mm Sectional Helical	32-100mm	30m
22mm Sectional Helical	50-150mm	Extendable

Safety and Control

- Manual clutch operation for immediate control
- Automatic stop upon handle release
- Adjustable height and angle support frame
