

Electric Drywall Sander with LED Lighting

This electric drywall sander is designed for sanding and smoothing walls and ceilings. It features a rotating sanding head, variable speed control, integrated LED lighting, and a dust extraction system.

Overview

Professional Wall Grinder

This electric drywall sander is engineered for efficient smoothing of walls and ceilings. It features integrated LED lighting to ensure high visibility in dim work environments and a variable speed control to match diverse surface requirements. With its ergonomic design and integrated dust extraction system, it offers a cleaner, more controlled sanding experience for professionals and DIY users alike.
