Product Overview

High-Performance HVAC Motor

This 48 Frame double shaft fan motor is precision-engineered for window-type air conditioning units. It offers reliable, efficient performance with features like automatic reset thermal protection and all-angle mounting capabilities. Designed for quiet operation and longevity, this motor is an ideal solution for residential and commercial HVAC applications requiring consistent air movement.

Key Features

Key Features

Class B Insulation, All Angle Mounting, Automatic Reset Thermal Protection, Overload Protection, Continuous Air Over, High Efficiency, Quiet Operation
