

Electric Fan Motor for Ventilation

This electric motor is designed for use in air conditioning and ventilation equipment. The motor features mounting brackets and a power cord.

Product Overview

High-Performance Ventilation Motor

This electric motor is engineered specifically for air conditioning and ventilation applications. Featuring a robust, yellow-coated housing and integrated mounting brackets, it is designed for reliable integration into electric fan systems. Its durable construction ensures consistent performance in demanding ventilation environments.

Technical Specifications

Housing Color

Yellow

Primary Application

Air conditioning and ventilation equipment

Component Type

Electric Fan Motor

Key Features

Mounting Brackets, Pre-wired, Ventilation Optimized
