

Electric Finishing Sander for Woodworking

This electric finishing sander is designed for smoothing surfaces. It features a rectangular sanding pad and an ergonomic handle, suitable for woodworking and other finishing applications.

Overview

Professional Finishing Sander

This electric finishing sander is engineered for precise material removal and surface smoothing in woodworking applications. Its compact, ergonomic design ensures operator comfort during extended use, while the integrated ventilation system promotes efficient cooling. Ideal for professional workshops, it provides the control and reliability needed for high-quality finishing tasks.
