Overview

Compact Electric Rapid Response Vehicle

This 1-ton electric fire truck is engineered for rapid emergency response in confined urban environments, airports, and commercial districts. Its fully electric powertrain delivers zero-emission operation and instant torque for quick maneuvering through narrow streets. Equipped with a high-pressure pump, water tank, and essential firefighting tools, it provides a sustainable, cost-effective alternative to traditional combustion-engine emergency vehicles.

Performance & Capacity

Payload Capacity	1 ton
Powertrain	Electric Motor

Equipment & Features

Included Equipment

- Water tank
- High-pressure pump
- Hose reel
- Foam extinguisher
- Emergency tools

Safety & Alerting	Emergency lighting, Sirens, Traffic management system
-------------------	---

Design & Construction

Design Advantages

Zero Emissions • Compact Size • Corrosion Resistant • Quiet Operation

Ideal Use Cases

- Airports
- Schools
- Hospitals
- Scenic spots
- Commercial districts
- Narrow urban streets
