

# Electric Floor Grinder for Surface Preparation

This electric floor grinder is designed for surface preparation and coating removal. It is suitable for concrete, stone, and tile with features such as adjustable handles and dust control.

## Overview

### Professional Surface Preparation

This robust floor grinder is engineered for efficient surface preparation, coating removal, and floor cleaning. Designed for versatility, it is suitable for concrete, asphalt, and steel surfaces. Its compact, durable construction ensures reliable performance and maneuverability in both confined spaces and open areas.

## Performance

### Compatible Surfaces

- Concrete
- Asphalt
- Steel
- Stone
- Tile

### Suitable Applications

Sidewalk repair, Coating removal, Floor preparation, Non-slip surface creation, Traffic marking removal, Concrete joints, Surface grinding

## Design & Ergonomics

### Operator Features

- Adjustable handles
- Variable speed settings
- Dust control options
- Compact design

### Usage Suitability

Professional • DIY
