

Electric Folding Bicycle with Rear Rack

This electric folding bicycle is designed for convenient transportation and storage. It features a folding frame, allowing it to be easily collapsed for storage in small spaces or transport in vehicles.

Overview

Convenient Electric Mobility

This electric folding bicycle is designed for seamless transportation and efficient storage. Its foldable frame allows for easy collapse, making it ideal for compact spaces or vehicle transport. Equipped with an integrated electric motor and frame-mounted battery, it provides reliable assistance for longer distances and uphill climbs.
