

Electric Food Chopper with Two Speeds

This electric food chopper has a powerful 500W motor. It features two speeds and pulse control, with a low speed for dicing and a high speed for chopping.

Product Overview

Professional Food Preparation

This versatile 500W electric food chopper is designed to streamline kitchen efficiency for culinary professionals and commercial settings. Featuring a robust motor, it offers dual-speed functionality and pulse control to handle everything from delicate dicing to heavy-duty ice crushing. Its ergonomic, innovative design includes specialized tools for precision shredding and a generous 700ml processing jar to maximize output in busy environments.
