

Electric Foot and Leg Massager with Heat

This electric foot and leg massager features adjustable settings for personalized comfort. It includes air compression massage, heat therapy, and multiple massage modes to improve circulation and relieve muscle tension.

Overview

Professional Electric Foot and Leg Massager

This electric foot and leg massager is designed to provide comprehensive relief through multi-point wheel mobile massage and infrared heat therapy. Featuring advanced air pressure kneading for the instep and targeted heel massage, it effectively alleviates fatigue and promotes circulation. With user-friendly one-key operation and customizable automatic physiotherapy programs, it is an ideal solution for relaxation in both home and office environments.
