

Electric Foot Spa and Massager with Heat

Electric foot spa and massager includes temperature control, vibration massage, and acupressure nodes. It features a digital control panel and a built-in heating element to maintain water temperature, massage rollers, and a pumice stone attachment.

Product Overview

Professional Electric Foot Spa and Massager

This electric foot spa and massager is designed to provide comprehensive relaxation and relief for tired feet. Equipped with advanced temperature control and a robust heating element, it maintains optimal water warmth during use. The device features integrated vibration massage technology and acupressure nodes to stimulate circulation and reduce fatigue effectively.
