

Electric Foot Therapy Massager with Water Heating

This foot massage device provides both relaxation and therapeutic benefits. It integrates massage rollers and a water heating system to soothe and rejuvenate tired feet.

Product Overview

Therapeutic Foot Care

The LY-207B foot massage device is engineered to provide a professional-grade, relaxing, and therapeutic experience. It features integrated massage rollers combined with a sophisticated water heating system designed to deeply soothe tired feet. With adjustable settings for both massage intensity and water temperature, users can easily customize their treatment for optimal comfort. Its ergonomic structure ensures ease of use, supported by a convenient control panel for seamless operation.
