

Electric Forklift 1.6-Ton Capacity

This electric forklift has a 1.6-ton lifting capacity. Its compact design allows for maneuverability in tight spaces, and solid rubber tires ensure durability.

Overview

High-Efficiency Electric Forklift

This 1.6-ton capacity electric forklift is engineered for versatile material handling in both indoor and outdoor environments. Its compact design ensures excellent maneuverability in tight warehouse spaces, while the battery-powered operation provides a clean, emission-free solution for your logistics needs. Built with durable solid rubber tires, this unit is ready to support demanding daily operations with reliability and ease.
