

Electric Forklift for Material Handling

This electric forklift is engineered for material handling tasks within warehouses and industrial facilities. Its design incorporates a compact frame for enhanced maneuverability, lifting forks optimized for palletized goods, and an overhead guard to ensure operator safety.

Overview

Versatile Material Handling Solution

This electric forklift is engineered for efficient material handling in both warehouse and industrial environments. Its compact design ensures superior maneuverability in tight spaces, while the robust lifting forks are optimized for secure palletized goods transport. Built with an overhead guard, it prioritizes operator safety during daily operations, making it a reliable choice for indoor and outdoor use on paved surfaces.

Technical Specifications

Power Source

Electric

Model Identifier

30-420

Suitable Environments

Warehouse, Industrial, Indoor, Outdoor (Paved)

Safety & Design

Safety Features

- Overhead guard
- Compact maneuverable chassis
