

Electric Forklift with Three-Pivot Design

This electric forklift is designed for both indoor and outdoor material handling. Its three-pivot design allows for enhanced maneuverability, and it can lift loads between 1.3 and 2 tons.

Overview

Versatile Electric Material Handling

This electric forklift features a specialized three-pivot design, engineered to provide exceptional maneuverability in tight spaces. It is built to handle loads between 1.3 and 2 tons, making it a robust solution for diverse warehouse, factory, and logistics environments. The inclusion of a protective overhead guard ensures operator safety while maintaining smooth and precise control during daily operations.
