

Electric Fruit and Vegetable Juicer

This electric juicer is designed for extracting juice from fruits and vegetables. It features a transparent feeding chute and collection container for easy monitoring and is equipped with a safety locking arm.

Product Overview

Efficient Juicing Performance

This compact electric juicer is designed for optimal performance, efficiently extracting juice from a variety of fruits and vegetables while separating pulp for a smoother beverage. Its sleek, modern design is perfectly suited for any kitchen countertop, blending aesthetics with functionality. Safety is prioritized with an integrated locking arm, ensuring secure operation during every use.
