

Electric Fruit and Vegetable Juicer

This high-performance juicer is designed for efficient and reliable operation. It is equipped with multiple speed settings to accommodate various types of fruits and vegetables.

Product Overview

High-Performance Juicing Solution

This high-performance electric juicer is engineered for efficient and reliable operation in professional and home kitchen environments. It features a robust motor and durable construction designed to handle various fruits and vegetables with ease. With its compact footprint, user-friendly controls, and essential safety mechanisms like overload protection, it offers a seamless blend of performance and convenience.

Technical Specifications

Model Number	BL-300
Device Type	Electric Juicer / Blender

Features

Performance Features

- Robust motor for high-efficiency operation
- Multiple speed settings
- Overload protection system
- Secure locking mechanism

Maintenance & Design	Compact Design, Easy to Disassemble, Easy to Clean
