

Electric Fuel Pump for Chevrolet and Daewoo

This electric fuel pump ensures reliable fuel delivery to the engine, optimizing performance and fuel efficiency. It is designed to meet or exceed OEM specifications, offering a direct fit and easy installation.

Product Overview

High-Performance Fuel Delivery

This electric fuel pump is precisely manufactured and rigorously tested to ensure reliable fuel delivery to the engine. Designed for specific vehicle applications, it optimizes performance and fuel efficiency while providing consistent pressure and flow. This unit serves as an ideal replacement for worn or malfunctioning pumps, offering a direct fit for straightforward installation.

Technical Specifications

Operating Pressure	3 Bar
Flow Rate	80 L/h
Part Number	EFP380901G

Compatibility

Cross Reference

- WALBRO: 5CA235
- WALBRO: GCA3348

Compatible Makes	Chevrolet, Daewoo
