

Electric Fuel Pump Module for Chevrolet

Electric fuel pump module ensures reliable fuel delivery to the engine in Chevrolet vehicles. This module is engineered to meet or exceed OEM specifications, providing optimal performance and durability.

Product Overview

High-Performance Fuel Pump Module

This electric fuel pump module is precisely manufactured and rigorously tested to ensure reliable fuel delivery for Chevrolet vehicles. Engineered to meet or exceed OEM standards, it provides consistent fuel pressure and flow for optimal engine performance. The unit includes essential components for a complete and efficient installation, contributing to improved fuel efficiency and reduced emissions.

Technical Specifications

Operating Pressure	3 Bar
Flow Rate	150 L/h
Part Number	EFM0940746

Compatibility

Cross Reference

- AIRTEX: E3941M
- ACDELCO: MU226

Compatible Vehicle Make	Chevrolet
-------------------------	-----------

Quality & Standards

Certifications

TUV • ISO/TS 16949:2002 • CE

Manufacturing Capabilities

Daily Production Output

18000 pcs
Units per Day

Development Cycle (Modules)	90-180 days
