

Electric Fuel Pump Module for LADA

This electric fuel pump module is designed for LADA vehicles. It ensures reliable fuel delivery to the engine, maintaining optimal performance.

Product Overview

Reliable Fuel Delivery Solution

This electric fuel pump module is precision-engineered for LADA vehicles, ensuring consistent fuel delivery and optimal engine performance. Designed to meet strict quality standards, the unit is 100% tested to guarantee durability and reliability under various operating conditions. It provides a stable fuel flow of 60 L/h at 3 Bar pressure, making it a dependable replacement part for maintaining vehicle efficiency.

Technical Specifications

Performance Metrics

3 Bar

Pressure

60 L/h

Flow Rate

Compatibility & References

Attribute	Value
Application	LADA
Part Number	EFM0000303
Cross Reference	UTEC: 21214-1139009
Internal Pump Model	EFP381802G

Quality & Compliance

Certifications

TUV • ISO/TS 16949:2002 • CE

Production Capabilities

Manufacturing Scale

- Annual production capacity: 3.8 million sets
- Daily output: 18,000 units
- Assembly infrastructure: 14 pump lines and 4 module lines
- Extensive product range: Over 700 types of pumps and modules
