

Electric Fuel Transfer Pump

Electric drum pump designed for transferring gasoline and other fuels. It features a self-priming mechanism, adjustable nozzle, and compatibility with standard drum sizes, making it suitable for industrial and commercial applications requiring efficient and safe fuel dispensing.

Product Overview

Professional Fuel Transfer Solution

This electric drum pump is engineered for the efficient and safe transfer of gasoline and other fuels. Designed for industrial and commercial environments, it features a robust self-priming mechanism and an adjustable nozzle for precise dispensing. Its design ensures compatibility with standard drum sizes, making it an essential tool for high-volume fuel management tasks.

Technical Specifications

Key Features

- Self-priming mechanism
- Adjustable nozzle
- Industrial-grade construction

Pump Type	Electric Drum Pump
Compatibility	Gasoline, Standard Drum Sizes

Application

Recommended Use

Industrial • Commercial
