

Electric Garden Shredder with Collection Box

This electric garden shredder is designed for processing branches and garden waste. It features a cutting mechanism for efficient shredding and includes a collection box for easy disposal of processed material.

Product Overview

High-Efficiency Garden Waste Management

This electric garden shredder is engineered to streamline garden maintenance by processing branches and organic waste into manageable mulch. Designed for high efficiency, the internal cutting mechanism ensures consistent shredding, while the integrated collection box minimizes cleanup time. The unit is built for portability, featuring wheels that allow users to move it easily across various terrains in the garden.

Technical Specifications

Power Source	Electric
Key Features	Cutting Mechanism, Collection Box, Portable Wheels, Garden Waste Reduction
Primary Application	Mulch production and garden waste volume reduction
