

# Electric Garden Water Pump

This electric garden water pump is a reliable solution for water transfer applications. It is designed for garden irrigation and water extraction, delivering a consistent flow rate and pressure.

## Product Overview

### Reliable Garden Water Transfer

The GP-DP garden pump is a robust and efficient solution designed for various water transfer applications, including garden irrigation and water extraction from wells or tanks. Featuring a powerful motor, it delivers consistent flow rates and pressure for both residential and commercial needs. Its compact design and integrated handle ensure easy transport and storage, while built-in thermal overload protection safeguards the motor against damage.

## Key Features

### Core Features

Thermal Overload Protection, Portable Design, Integrated Handle, Residential & Commercial Use

## Technical Specifications

### Common Applications

- Garden Irrigation
- Well Water Extraction
- Tank Water Transfer
- General-purpose Pumping

### Performance Highlights

**1 High**

Operational Reliability
