

Electric Garment Steamer with Wheeled Base

This garment steamer is a household appliance for removing wrinkles from clothing and fabrics. It includes a water tank for steam generation, a heating element, a steam nozzle, a wheeled base, and a support pole.

Product Overview

Professional Garment Care Solution

This electric garment steamer is designed to efficiently remove wrinkles from a wide variety of clothing and fabrics. Featuring a durable plastic housing and a convenient wheeled base, it offers both portability and stability during use. The integrated support pole allows for easy garment hanging, making it an essential tool for maintaining professional-looking attire.
