

Electric Golf Cart with Cage Enclosure

This electric golf cart includes a white body, clear windshield and white roof. The black metal cage enclosure provides added safety and protection for the occupants.

Overview

Designed for Utility and Safety

This electric golf cart is engineered for versatile use in environments requiring efficient transport, such as large facilities, resorts, or golf courses. It features a robust metal cage enclosure that provides enhanced safety and protection for occupants during operation. With its clean white body and practical design, this vehicle combines reliability with a professional appearance suitable for commercial applications.
