

# Electric Grinding Pulverizer

This electric grinding pulverizer features a fashionable appearance and reasonable structure. It is equipped with a powerful motor for high grinding speed and long service life, and includes a movable inner cup for convenient cleaning.

## Product Overview

### Professional Electric Grinding Pulverizer

This high-performance electric grinding pulverizer is designed with a reasonable structure and a fashionable appearance, making it a reliable addition to any professional kitchen or food processing environment. It features a powerful, long-life generator capable of high-speed grinding while maintaining low noise levels. With a user-friendly push-button operation and a convenient, removable inner cup, this device ensures both efficiency and ease of maintenance.

## Technical Specifications

Capacity	50 g
Voltage	220V 50Hz
Power	150 W

## Design & Features

### Safety & Hygiene

Food Hygiene Compliant • Safety Lock Cover

Model Number	SP-7400
Key Features	Stainless Steel Blade, Transparent Cup Cover, Movable Inner Cup, Safety Lock Function, Low Noise Operation
