

# Electric Hand Planer for Woodworking

The electric hand planer is designed for smoothing and shaping wood surfaces in woodworking. It features a high-speed rotating blade system and adjustable depth settings for precise material removal.

## Product Overview

### Precision Woodworking Performance

This electric hand planer is engineered for professional woodworking, providing efficient smoothing and shaping of wood surfaces. Featuring a high-speed rotating blade system within a robust frame, it ensures precise material removal for high-quality finishes. Designed with ergonomics in mind, the tool minimizes user fatigue, making it an ideal choice for both demanding professional carpentry tasks and intensive DIY projects.

## Technical Specifications

### User Suitability

Professional • DIY Enthusiast

### Application

Woodworking, Carpentry, Surface Smoothing, Material Shaping

## Key Features

### Performance Highlights

**1 Yes**

Adjustable Depth Control

### Design Benefits

- High-speed rotating blade system
- Sturdy, durable frame construction
- Ergonomic handle design for comfort
- Precise material removal capabilities
