

Electric Hand Planer for Woodworking

The electric hand planer is designed for smoothing and shaping wood surfaces. It utilizes a high-speed rotating blade system to remove thin layers of material, providing adjustable depth settings for precise material removal.

Product Overview

Professional Electric Hand Planer

This high-performance electric hand planer is designed for professional woodworking, carpentry, and intensive DIY applications. It utilizes a high-speed rotating blade system to efficiently smooth and shape wood surfaces by removing precise, thin layers of material. Built for reliability and control, the tool features adjustable depth settings and an ergonomic grip to ensure consistent results on various wood projects.

Technical Specifications

Tool Type	Electric Hand Planer
Best For	Woodworking, Carpentry, Material Shaping, Surface Smoothing

Features

Core Features

- High-speed rotating blade system
- Adjustable depth control for precision
- Ergonomic handle for enhanced control
- Durable construction for long-term use
