

Electric Herbal Decoction Pot

This electric decoction pot is designed for traditional Chinese medicine preparation and slow cooking. It features a ceramic pot with a digital display and control panel for setting cooking times and modes.

Product Overview

Professional Electric Herbal Decoction Pot

This electric decoction pot is specifically engineered for the precise preparation of traditional Chinese medicine and slow cooking applications. Utilizing natural mineral materials, the ceramic design ensures slow, effective heat conduction to extract the full essence of medicinal ingredients. The unit features convenient automatic operation, including a keep-warm function and versatile settings for medicinal cuisine, tea, and soup preparation.
