

Electric Hot Water High Pressure Washer

This heavy-duty electric hot water pressure washer is designed for industrial and commercial cleaning. It features a high-pressure pump, chemical injection system and safety features for removing tough stains.

Overview

Heavy-Duty Cleaning Performance

The HWP-3605E is a robust electric hot water pressure washer engineered for demanding industrial and commercial environments. It combines a high-efficiency heating system with a powerful high-pressure pump to effectively eliminate stubborn grease, oil, and grime. Designed for mobility and ease of use, this unit is an ideal solution for maintaining equipment, metal surfaces, and concrete flooring.

Technical Specifications

Model Number	HWP-3605E
Power Source	Electric

Features

Key Features

- Hot water heating system
- High-pressure pump
- Integrated chemical injection system
- Robust frame with wheels
- Safety protection systems

Applications

Cleaning Capabilities

Grease Removal • Oil Removal • Dirt Removal

Suitable Surfaces	Concrete, Metal, Industrial Equipment
