

Electric Hydraulic Rebar Cutter

This electric hydraulic rebar cutter is designed for cutting steel reinforcing bars (rebar) on construction sites. It utilizes a powerful hydraulic system to provide efficient cutting performance.

Overview

High-Performance Rebar Cutting Solution

The RC-25 electro-hydraulic rebar cutter is a robust, portable tool engineered for demanding construction environments. It utilizes a powerful hydraulic system to deliver consistent, clean cuts on steel reinforcing bars, significantly reducing manual labor and increasing on-site efficiency. Designed for versatility, it handles a wide range of rebar diameters, making it an essential asset for bridge building and general construction projects.

Technical Specifications

Rebar Diameter Range

4 MM

Min Rebar

25 MM

Max Rebar

Power Input	220V / 110V
Wattage	1300W / 1440W
Cutting Speed	5 S

Physical Dimensions

Weight Specifications

Type	Weight
Machine Weight	24.5 Kg
Gross Weight	32 Kg

Machine Dimensions	480 x 150 x 255 MM
Carton Dimensions	555 x 205 x 327 MM

Logistics & Compliance

Certifications

CE • ROHS

Packaging	One Pc / Metal Box / Cardboard Ctn
