

Electric Ice Cream Maker with Insulated Bowl

This electric ice cream maker features a double-walled insulated freezer bowl. It is equipped with a motorized paddle for churning and a transparent lid.

Product Overview

Efficient Countertop Ice Cream Maker

The ICK-1100 is a compact and efficient electric ice cream maker designed for consistent performance in small-scale frozen dessert preparation. Featuring a 1.0L quick-freeze insulated bowl and a motorized paddle with bi-directional motion, it ensures smooth and uniform churning for ice cream, sorbet, or yogurt. With a durable motor and built-in safety features like a reversible thermostat, this unit is built for reliable, continuous operation up to 40 minutes per cycle.
