

Electric In-Tank Fuel Pump

This electric in-tank fuel pump is designed for automotive applications. It delivers fuel from the fuel tank to the engine at a specified pressure and flow rate.

Product Overview

High-Performance In-Tank Fuel Pump

This electric in-tank fuel pump is engineered for reliable automotive fuel delivery, ensuring consistent flow from the tank to the engine. Constructed with a durable cylindrical metal housing, it is designed to withstand the rigors of daily operation. The unit includes an integrated mounting bracket and clearly defined inlet and outlet ports, making it a versatile solution for various vehicle models and engine types.

Technical Construction

Housing Material	Stainless steel or aluminum
Mounting	In-tank with plastic bracket

Compatibility

Application	Automotive, Multi-model
