

Electric Induction Cooker with Cookware Set

This induction cooker is compatible with both purple clay and metal cookware, offering versatile cooking options. It comes with a purple clay wok, a purple clay soup boiler, and a metal pan.

Product Overview

Versatile Induction Cooking System

The DCH2038-C is an advanced induction cooker designed to offer maximum flexibility in the kitchen by supporting both traditional purple clay cookware and standard metal cookware. Equipped with an intelligent cookware identification device, it automatically detects the material type to ensure optimal heating performance. This comprehensive set includes a purple clay wok, a purple clay soup boiler, and a metal pan, making it a ready-to-use solution for diverse culinary needs.
