

Electric Insect Killer with UV-A Light

This electric insect killer attracts and eliminates flying insects using a UV-A light source. Insects are drawn to the light and electrocuted by a high-voltage grid.

Product Overview

Professional Insect Control Solution

This electronic insect killer utilizes UV-A light technology to effectively attract and eliminate flying insects. Designed for reliability, the unit features a high-voltage grid enclosed within a protective safety cage, ensuring safe operation while maintaining high efficacy. It is engineered for continuous use and is suitable for both indoor and outdoor environments, making it a versatile choice for pest control.

Technical Specifications

Model Identifier	JS30-15W
Power Rating	15 W
Power Source	Standard AC power
Operation Mode	Continuous
Light Technology	UV-A Fluorescent Lamp
Usage Environment	Indoor, Outdoor

Safety Features

Safety Mechanism

Protective Cage • High-Voltage Grid
