

Electric Insect Killer with UV Light

This insect killer is designed to effectively eliminate flying insects such as mosquitoes, flies, and moths. It features a UV light that attracts insects, which are then electrocuted by a high-voltage grid.

Product Overview

Effective Insect Control Solution

This electric insect killer utilizes advanced UV light technology to effectively attract and eliminate flying pests such as mosquitoes, flies, and moths. Designed for versatility, the unit is suitable for both indoor and outdoor environments. It features a protective cage mechanism to ensure safety while maintaining high efficiency in insect control.

Technical Specifications

Target Pests	Mosquitoes, Flies, Moths
Usage Environment	Indoor, Outdoor
Attraction Method	UV Light

Safety & Design

Safety Features

- Protective cage enclosure
- High-voltage grid for effective elimination
