

Electric Insect Killer Zapper

This insect killer is designed to attract and eliminate flying insects such as mosquitoes, flies, and moths. It features a UV light that lures insects into an electrically charged grid, instantly killing them.

Product Overview

Effective Insect Control Solution

This electric insect killer is designed to efficiently attract and eliminate flying insects such as mosquitoes, flies, and moths using advanced UV light technology. It features an electrically charged grid enclosed within a protective cage to ensure safety while maintaining high performance. Suitable for both indoor and outdoor environments, this device offers a chemical-free, environmentally friendly alternative for pest management in homes, patios, and gardens.

Technical Features

Attraction Method	UV Light
Safety Features	Protective Cage, Accidental Contact Prevention

Usability

Usage Environment	Indoor • Outdoor
Maintenance	Removable collection tray for easy cleaning

Key Benefits

Advantages

- Environmentally friendly
- Chemical-free operation
- Easy to clean and maintain
- Versatile indoor and outdoor use
