

Electric Instant Hot Water Dispenser with UF Filtration

This electric dispenser provides instant hot water using ultrafiltration technology. It offers multiple temperature settings and dispenses fresh, mineral-rich water in seconds.

ADDITIONAL IMAGES

Product Overview

Compact countertop design for instant hot and purified mineral water.

Instant Mineral Water Purification

This countertop instant hot water dispenser features advanced ultrafiltration technology, providing fresh, mineral-rich drinking water on demand. Designed for efficiency, it utilizes a wrap-around heating wire system to deliver hot water in seconds without the need for a bulky storage tank. With its compact, installation-free design and multi-stage temperature controls, it is a versatile solution for home or office settings.

Technical Specifications

Performance Metrics

2100 W Heating Power	1 L/min Water Flow Rate	3000 L Total Purification Capacity	4.4 KG Weight
--------------------------------	-----------------------------------	--	-------------------------

Model	W2
Electrical Requirements	220V / 2200W Rated Power
Noise Level	<48dB(A)

Filtration and Water

Longer Service Life and 3-Second Replacement
 The filter can be easily replaced by spinning and lifting
 5 cups of 200ml mineral water can be produced in 1 minute.
 5 adjustable quantitative water intake: 150ml, 250ml, 350ml, 450ml, 999ml

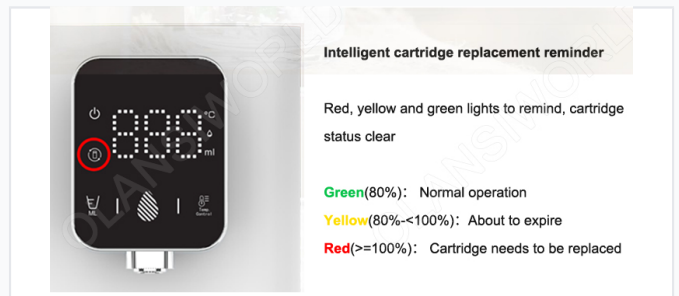

Simplified maintenance with a quick-connect filter mechanism.

Filtration Technology	Ultrafiltration (UF)
Filter Replacement Interval	24 months
Water Tank Capacity	2.5 L
Source	Tap water

Features and Controls

Intelligent temperature sensing for precise control between 25°C and 100°C.

Easy-to-read LED indicators for monitoring filter life status.

Temperature Settings

- 25°C (Normal)
- 45°C (Milk Powder)
- 55°C (Honey)
- 85°C (Tea)
- 100°C (Boiling)

Volume Adjustment

- 150ml
- 250ml
- 350ml
- 450ml
- 999ml

Filter Status Indicators

Green: Normal • Yellow: Expiring • Red: Replace
