

Electric Instant Water Heater with Digital Display

This electric water heater is designed for household use, providing on-demand hot water. It features a digital display showing the current water temperature and settings.

Product Overview

On-Demand Heating Solution

This electric instant water heater is engineered for efficient household use, providing a reliable supply of hot water on demand. Featuring a modern digital interface, it allows for precise monitoring of current water temperatures and convenient power adjustments. Its compact design and decorative floral aesthetic ensure that it fits seamlessly into various domestic environments, making it ideal for showers and general household needs.

Technical Specifications

Operating Temperature	42 °C
Rated Power Output	26 kW

Features

Key Features

- Digital temperature display
- Adjustable power settings
- Compact space-saving design
- Decorative floral front panel

Intended Use	Residential, Shower, Instant Heating
