

Electric Jigsaw for Wood and Metal

This powerful jigsaw is designed for precision cutting in various materials. It features a high-performance motor, variable speed control, tool-free blade change, and adjustable bevel settings for angled cuts.

Product Overview

High-Performance Electric Jigsaw

This powerful and versatile electric jigsaw is engineered for precision cutting across a variety of materials, including wood and metal. It features a high-performance motor designed for demanding tasks, alongside variable speed control for optimal handling. With tool-free blade changes and adjustable bevel settings for angled cuts, it is an essential tool for professional workshops and advanced DIY projects.

Technical Specifications

Power Output

3600 W

Power Rating

Key Features

- Variable speed control
- Tool-free blade change mechanism
- Adjustable bevel settings for angled cuts
- High-performance motor

Usage Type

Professional • DIY

Suitable Materials

Wood, Metal
