

Electric Juice Extractor

This electric juice extractor efficiently extracts fresh juice from fruits and vegetables. It features a robust motor, stainless steel construction, a large feeding tube, and a pulp ejection system for continuous juicing.

Overview

Professional Juice Extraction

The HL-2098 Juice Extractor is a robust kitchen appliance engineered for high-efficiency extraction. Featuring a powerful 700W motor and dual speed settings, it ensures fast processing for a wide variety of fruits and vegetables. Built with surgical stainless steel components and a durable housing, this unit is designed for hygiene, longevity, and consistent performance in demanding environments.

Technical Specifications

Motor Power	700 W
Voltage Input	100-240V AC / 50-60Hz
Speed Settings	2

Capacity & Components

Capacity Metrics

1000 ml Juice Jug	200 ml Pulp Container
