

# Electric Juice Extractor

This electric juice extractor efficiently processes fruits and vegetables. It provides fresh juice by separating the pulp.

## Product Overview

### Compact Electric Food Processor

This electric juice extractor and food processor is designed for efficiency in small-batch food preparation. Featuring a durable white housing and a transparent bowl, it allows for easy monitoring of ingredients during chopping and pureeing. The unit is equipped with a safety interlock mechanism and a pulse function, providing users with the precision control needed for consistent results.

## Technical Specifications

### Housing Color

White

### Key Features

Pulse Function, Safety Interlock, Transparent Bowl, Compact Design

### Primary Application

Chopping and pureeing ingredients
